LEGACY FOURSOME

SPORTS MEDICINE FELLOWSHIP

\$30,000*

In honour of the St. Mary's Masters 30th anniversary we are launching a Legacy Foursome that will directly benefit the **St. Mary's Orthopaedic Fellowship Program**. Through your purchase of a Legacy Foursome, you will be making a meaningful impact on the hundreds of fellows who come to us from around the world for first-rate surgical training with the latest techniques and state-of-the art equipment.

CLINICAL TRAINING

Fellowship trainees will master the knowledge, skills and rehabilitative measures to treat recreational and competitive athletes.

Across Canada, fellows bill their respective health care systems. In Quebec, university-based fellowship programs in all specialties require outside funding for both salary and tuition. Fellowship will ensure that trainees master the knowledge base, the surgical skills and the rehabilitative measures to optimally treat both recreational and competitive athletes.

RESEARCH ACTIVITY

Minimum 1 research project submitted for publication and/or presentation.

The St. Mary's Hospital / McGill University Sports Medicine Fellowship Program was initiated in July 2010 as the 1st full-time fellowship program at St. Mary's Hospital. Over the years our reputation has grown internationally as we have trained newly graduated Orthopaedic surgeons from the USA, Brazil, Israel, Greece, Lebanon, Kuwait, and Saudi Arabia, to name a few.

EDUCATION

1 year (12 months)

Be a part of this worthy cause by purchasing a Legacy Foursome and your generous contribution will be recognized by way of a personalized plaque that will be mounted on the wall of our Sports Medicine Clinic. In addition to the lifetime recognition that the Legacy Foursome provides, it further empowers our Orthopaedic department to continue to provide the outstanding teaching, research and patient-centered care for which St. Mary's is so proudly known.

COST OF A FELLOWSHIP

\$60,000

* The St. Mary's Masters \$30,000 Legacy Foursome contributes to half the cost of a one year fellowship.

"This year, with the 30th St. Mary's Masters Golf Tournament, your support of *sports-helping-sports* will not only help us maintain this program but assist in upholding St. Mary's academic commitment to McGill University."

Dr. Ron Dimentberg

St. Mary's Chief of Orthopaedic Surgery, Associate Professor of Surgery, McGill University
